

Pass Task 1.1.4

Below is a screenshot of the piping command being used to output the search results from P1.1.3 into a text document. In this case, `>` was used to output the resultant entries to the text document `surname_output.txt`

The command used as `grep -E "(S[a-zA-Z]*,\s[^S^s][a-zA-Z]*)" People.txt > surname_output.txt`
